

# Cisco SD WAN Operation and Deployment (ENSDW) 1.0

## ✓ Prerequisites

It is recommended, but not required, to have the following skills and knowledge before attending this course:

- Strong understanding of enterprise wide area network design
- Strong understanding of routing protocol operation, including both interior and exterior routing protocol operation
- Familiarity with Transport Layer Security (TLS) and IP Security (IPSec)

The following are recommended Cisco learning offerings that may help students meet these prerequisites:

- Implementing Cisco IP Routing (ROUTE)
- Troubleshooting and Maintaining Cisco IP Networks (TSHOOT)
- Implementing Cisco Edge Network Security Solutions (SENS)

## Course Content

The Cisco SD-WAN Operation and Deployment (ENSDW) v1.0 course provides an overview of the Cisco SD-WAN solution and SD-WAN components. Students will learn how to create, manage, and operate a secure extensible network using Cisco SD-WAN products. The course covers how to configure, operate, and monitor overlay routing in a secure extensible network. Students will also learn about policies and quality of service (QoS) in the SD-WAN overlay network.

Upon completion of this course, you will be able to:

- Identify the various components and architecture of the Cisco SD-WAN solution
- Deploy vEdge routers in a secure extensible network.
- Create templates to aide in the deployment and operation of the secure extensible network
- Configure and verify overlay routing in the secure extensible network
- Create simple policies to control traffic flow in the secure extensible network

## Course Outline

---

### Module 1: SD-WAN Solution Components

- Lesson 1: SD-WAN Solution Overview
- Lesson 2: SD-WAN Components
- Lesson 3: Managing SD-WAN Components

### Module 2: Secure Extensible Network Deployment

- Lesson 1: Secure Control Plane Operation
- Lesson 2: Secure Control Plane Deployment
- Lesson 3: Secure Data Plane Operation
- Lesson 4: Cloud Deployments and Redundancy

### Module 3: SD-WAN Template Deployment

- Lesson 1: Templates Overview
- Lesson 2: Feature Templates
- Lesson 3: Device Templates
- Lesson 4: Attaching Devices to Templates

### Module 4: SD-WAN Overlay Routing

- Lesson 1: Overlay Routing Overview
- Lesson 2: OMP Route Advertisements
- Lesson 3: OMP Route Redistribution and Network Segmentation
- Lesson 4: Configuring and Verifying Overlay Routing

### Module 5: SD-WAN Policies and QoS

- Lesson 1: Policy Overview and Framework
- Lesson 2: vSmart Policy Operation and Construction
- Lesson 3: Forwarding and QoS Overview
- Lesson 4: Configuring and Monitoring QoS Forwarding

## Who Should Attend

---

- Enterprise Network System Installers
- System Integrators
- System Administrators
- Network Administrators
- Solutions Designers
